The Fast and Easy Way to Seal Your Envelopes

Model 720 **Automatic Envelope Sealer**

**Portable, Desktop Unit is Clean And Quiet For Use In
Any Office Or Department.**

- **Convenient** — Seals all common envelopes, nested and unnested. Saves wear and tear on other equipment used for just sealing.
- **Increases Productivity** — Seals a wide variety of envelopes hands-free. Eliminates manual wetting, flap folding and the closing of envelopes.
- **Easy to Use** — No special training required. Automatic start and stop. Just load the envelopes and go!
- **Reliable** — Seals and secures mail at the source. Keeps accurate count with resettable piece counter.

The Practical, Economical Way to Seal Your Envelopes — Hands Free!

Combat bottle necks and extra wear and tear on mailroom equipment used just for sealing. Or, if you are currently sealing envelopes manually, now you can avoid this messy, time-consuming task. With Secap's Model 720 fully automatic sealer, you just load the envelopes and go! The unit automatically turns on when the envelope enters the machine and turns off when the envelope exits. Seal your mail and get it out the door, fast—up to 300 envelopes per minute.

The 720 handles all usual envelope sizes and flaps, nested and unnested. It also automatically adjusts to handle envelopes of different thicknesses for higher productivity. So quiet and easy to use, the Model 720 Sealer requires no special tools or training so anyone in the office can use it. Contents stay confidential being sealed at the source.

The 720 Sealer offers high performance with its self-cleaning moistening system. Water is fed from a large transparent reservoir alleviating calcification build up. This is extremely efficient in contrast to machines with a wick, felt strip bristle or slit, all of which dry up easily and become blocked resulting in unsealed envelopes. The Secap sealer offers practical, modern convenience as well as improved productivity and performance at an affordable price.
