

OMATION[®] MINI MILL[™]
for the small office

No more cutting important documents.

Ovation Envelopers open your
mail without damaging contents.

OPEX[®]
CORPORATION

Opening envelopes has never been easier and more economical in such a small package.

Mail catch tray (optional)

The automated mail opener that is small enough for the front desk and powerful enough for the back office.

COMPACT SIZE

The Ovation® MINI MILL™ is small enough to fit on just about any surface with a footprint under 17 inches. It is also lightweight at only 19 pounds.

EASY TO OPERATE

With its intuitive design, using the MINI MILL is a snap. Simply flip on the power button, slide mixed mail into the feeder, and the MINI MILL will do the rest.

MILLING TECHNOLOGY

At the heart of the MINI MILL is milling technology. By milling tiny chips from the edge of the envelope instead of slicing it, the MINI MILL quickly opens mail while protecting its contents. The MINI MILL also protects from painful paper cuts by producing a soft feathered edge.

ATTRACTIVE MODERN DESIGN

The MINI MILL complements any office environment. With its larger capacity chip drawer, it stays clutter-free. The optional mail catch tray completes the look.

DURABLE CONSTRUCTION

Since the first Ovation Envelopener was introduced in 1974, it has become the most popular line of automated mail openers. This is due in large part to the quality components and craftsmanship that goes into every Ovation product.

AFFORDABLE

Reliable milling technology is now priced for the small office. With the superior value the MINI MILL offers, no business or department should be without one.
