Seals **most** flap shapes including pointed, rounded & square flaps

### Electrical:

85...132VAC/60Hz and 180...264VAC/50Hz

### Weight:

67 lbs.

### Dimensions:

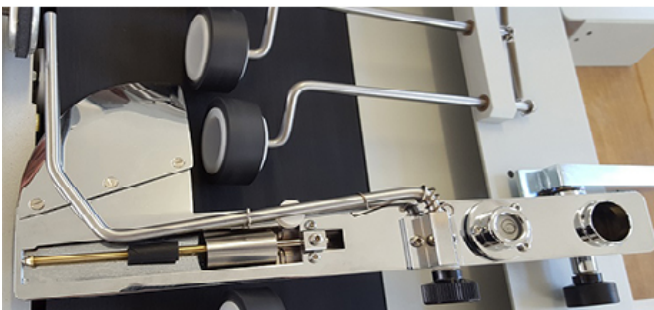

34" L x 20" W x 18" H

### Shipping Weight:

82 lbs. **MUST SHIP FREIGHT**

Standard Large 15" Long Tray

Available Options: Square Flap Conversion Kit

MERCURY S2 square flap conversion kit consists of:

- 1x basin p/n MM604SF

Machine Specifications are subject to change without notice.

## The Practical & Economical Way to Seal Your Envelopes and Flats — Hands Free!

Combat bottlenecks and extra wear and tear on mail-room equipment used just for sealing. Or, if you are currently sealing envelopes manually, now you can avoid this messy, time-consuming task.

With the Mercury S2 IRC fully automatic sealers, you just load the envelopes and go!

Seal your mail and get it out the door, fast – variable speed up to 300 envelopes per minute (18,000 per hour)

The Mercury S2 IRC handles most usual envelope sizes and large flats; the 2 stage media thickness allows the S2 IRC sealers to handle envelopes of different thicknesses for higher productivity. So quiet and easy to use, the S2 IRC sealers require no special tools or training, so anyone in the office can use it. Contents stay confidential being sealed at the source.

The S2 IRC sealers offer high performance with a self-cleaning moistening system. Water is fed from a large transparent reservoir alleviating calcification build up. This is extremely efficient in contrast to machines with a wick, felt strip bristle or slit, all of which dry up easily and become blocked resulting in unsealed envelopes.

The Maag-Mercure sealers offer practical, modern convenience as well as improved productivity and performance at an affordable price.
