

RENA SYSTEMS

Addressing Mail Is What We Do™

EASYFeed 120

Heavy Duty EASYFeed 120 Material Feeder

The EASYFeed 120 combines our new Bow Separation™ technology with a highly adjustable design to create a versatile feeding solution, while innovative material guides, full length belts and pressure-regulating components provide smooth and reliable feeding for any mailing operation.

Our Most Innovative Feeding Solution!

- Truly Effective Bow Separation™ Technology
- New Elevation Wedge For Even Feeding Pressure
- Highly Customizable Design For Any Project
- Features An Exclusive Material Jog Function
- Straight-Thru Paper Guides For Absolute Control
- Seven Positionable Belts
- Easy To Service And Maintain

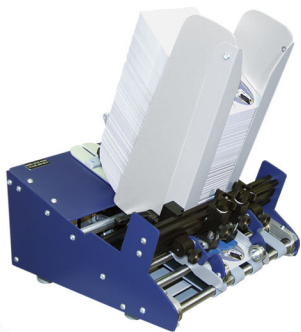

We continue to offer the most innovative products since we created the first tabletop addressing system 20 years ago. Now we offer everything you need to make the most out of your direct mail operation! Call us for more information on our inkjet systems: (888) 444-7362.

RENA EASYFeed 120

The Market's Most Innovative Feeding Solution

Unique Bow Separation™ Technology.

It's all about the separation — Bow Separation™ to be precise. The EASYFeed feeders are the first Rena Systems feeders to use this technology. By moving the separators between the belts, a bow is formed in the material. This bow serves two functions: reduced friction from the stack and increased piece rigidity. This makes marring and double feeding virtually disappear while improving feed consistency.

Total Control System.

Straight-Thru material guides extend down below the material stack and feed belts and run straight through the exit section, providing unparalleled registration/material handling. The repositionable feed belts go all the way from feed to exit, keeping consistent pressure on each piece to optimize smoothness. Three thick friction grab belts with four transport belts and two ball bearing pressure rollers keep control of the piece all the way through from separation to transit to exit so EasyFeed feeders feed razor straight.

Integrated With Rena Products.

The EASYFeed 120 features an integrated start/stop interlock that allows other Rena Systems products to control paper flow. It also has infinitely variable speed control and our unique material jog button for easy setup.

Built For Production.

The EASYFeed 120 is the fastest and most reliable tabletop feeder we offer, operating at speeds of 40,000 pieces per hour. With a hopper capacity of 625 no. 10 envelopes and unique Bow Separation™, it requires little attention during any given run.

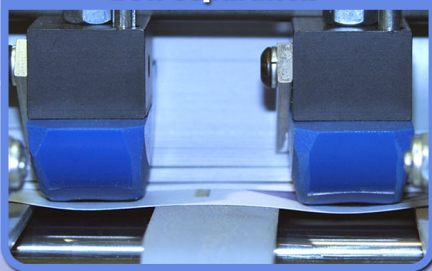

Product Specifications

Speed:	Up to 40,000 pieces per hour (based on a 4" x 6" post card)
Controls:	Comes standard with variable speed and jogging features.
Material Size:	Min: 3 1/8" x 2" L Max: 12" x 17" L
Material Thickness:	Up to 1"
Hopper Capacity:	13"; 625 No. 10 Envelopes
Dimensions:	14 1/2" W x 17" L x 19" H
Weight:	36 lbs.
Electrical:	120 VAC 5A 50/60 Hz
Options:	Adjustable floor stand.
