DUTY CYCLE	30 million pieces total or 500,000 per month over a 5-year life cycle

RENA Systems started in 1984 with a single product, a labeler. We expanded from there to offer the first tabletop tabber, in the form of a combination unit that proved extremely popular. The fast and efficient L-250 Labeler/Tabber is our most recent evolution of that family of products. With a proven design that has been refined into a true workhorse.

The L-250 is fast and versatile, handling up to 20,000 pieces/hr applying labels or tabs on a standard tri-folded mailpiece. It applies clear, translucent or paper tabs with ease in a variety of tab sizes and can apply labels over 4" wide. The L-250 uses tab rolls to keep jobs running longer. The precision placement of its labeling is accurate to within 1/8 of an inch.

The simple and elegant design of the L-250 ensures smooth material handling makes set-up simple. The unit is engineered to be easy-to-run in-line with various console products. It comes standard with a label shelf for fanfolded 1-up address labels and a tab reel that accommodates up to 9" diameter rolls, over 10,000 tabs!

It may be a tabletop unit, but the L-250's heavy duty aluminum and steel construction will give you years of reliable high performance use. Contact your local RENA Systems dealer today and schedule a no-hassle demonstration. The versatile L-250 Labeler/Tabber is sure to make jobs easier, more profitable and more efficient.

KEY FEATURES

- Apply 1-up labels or tabs (in clear, paper, translucent) with one versatile and affordable unit
- Tabs or labels at speeds of 20,000/hr with accurate positioning
- Cantilevered head allows the unit to run wider materials
- Comes with great accessories like our tab reel and integrated catch tray
- Runs high quality RENA Systems tab rolls up to 9" in diameter with a standard 3" core size.
